

HARK - HELICOPTER AERIAL RESCUE KIT

The HARK, Helicopter Aerial Rescue Kit, is the most advanced search and rescue aerial deployed life raft system on the market. It is an air-to-sea rescue system which is manually deployed from rotary winged aircraft. Each kit that is deployed provides a 10 man life raft, with sufficient survival contents to sustain life for 6 – 10 persons for 24 hours.

- Air to sea rescue system
- For rotary wing
- Life raft for 6 to 10 people (per kits)
- Up to two kits per drops
- Quick release
- Deploy with a drogue for smooth water impact
- Life raft inflates by water activation
- Accessories compatible with ARK

TECHNICAL DATA:

- Life Raft separation : 76m up to for 2 Kits (250ft)
- Rate of descent : 21m/sec - (70 ft/sec)
- Deployment speed / altitude : from a hover to 90 to 152 m MaSL
- (90Kts @ 300 – 500ft)
