

**Airborne Systems** supplies a range of cruciform cargo parachutes for the airdrop of light to medium weight supplies from low altitude. Used singly or in clusters, these parachutes can deliver loads ranging between 23 – 4,545kg (50 – 10,000lb) and can be dropped from either the side door or cargo ramp of the aircraft.

## Technical Specification

Type	GQ6m	SC14	SC15 MK2
NATO Stock Number	1670-99-770-3072	Not yet assigned	1670-99-812-4653
Part Number	MRIGQ1460	IAC-C16791	MRIRV848B
Canopy Type	Cruciform	Cruciform	Cruciform
Min Load Capacity Per Canopy	23kg (50lb)	227kg (500lb)	317kg
Max Load Capacity Per Canopy	91kg (200lb)	590kg (1,300lb)	1134kg (2,500lb)
Minimum Drop Altitude	77m (250ft)	92m (300ft)	123m (400ft)
Assembly Weight	4kg	25kg (55lb)	70kg (154lb)

Deployed by static line, the cruciform shape provides excellent stability and fast opening which enables these parachutes to be dropped from low altitude, 77m (250ft) to 123m (400ft) above ground level, giving minimum drift and greater accuracy.
