

HELICOPTER RESCUE STROP

The IrvinGQ Helicopter Rescue Strop is designed primarily to facilitate the rescue of survivors from the sea; however, it is permissible to use the strop to rescue survivors in other conditions. The strop can be donned by an uninjured survivor of any size with relative ease, unaided, but usually a member of the crew of the rescue aircraft is lowered on the winch cable with the strop, to aid both injured and uninjured survivors. No special clothing or equipment is required to enable the strop to be used.

CONSISTS OF:

- Nylon webbing strop
- D-rings attached to the helicopter winch hook
- Slider
- Webbing handle for control and to restrain the survivor

AVAILABLE IN 3 LENGTHS:

- 6 ft 6in : 1.98m Part Number : GQD31299/1
- 7 ft : 2.13 m Part number : GQD31299/2
- 8ft : 2.44 m Part number : GQD31299/3

HYPOTHERMIC LIFT STROP:

The IrvinGQ Hypothermic Lift Strop when used in conjunction with a standard Rescue Strop, allows survivors suffering from hypothermia to be lifted horizontally into the aircraft.

- Part number: GQD40021
