

ACCESSORIES- AIRCREW CUTTER & GRABBIT HOOK

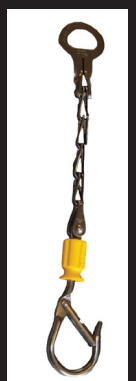

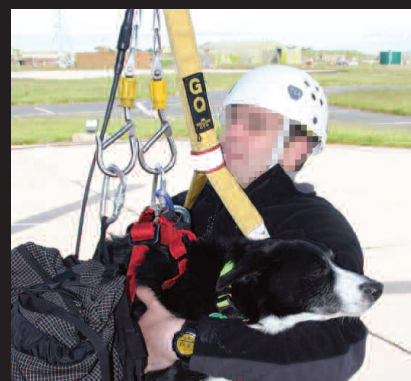

The IrvinGQ Aircrew Cutter Mk 1 is designed to cut parachute rigging lines and restraint harness webbing. It was developed for the UK Ministry of Defence (UK MOD) to replace the Emergency Knife Mk 3.

- The Aircrew Cutter Mk 1 comprises a two-part ABS moulded handle which contains a sliding / locking blade operated by a spring-loaded button. The blade has a shrouded cutting edge and a stabbing point.
- The blade will cut through a double thickness of Nylon 6.6 (up to 6 mm), Kevlar and Nylon 6.6 parachute rigging line.
- By extending the blade a fixed distance, the cutter can be used to puncture an inflated life preserver without causing injury to the wearer.
- The cutter is stowed in a purpose-built pocket / pouch which has been designed to be sewn or attached with adhesive to flying clothing. The cutter is attached to the pouch with a lanyard.
- All materials are corrosion resistant and all metal components have been de-magnetized.
- The cutter is designed for a single emergency use In service with the UK Armed Forces since 1998.

The Grabbit hook is designed to aid the rescue of a survivor wearing an aircrew life preserver when other methods of rescue may be difficult, by night, during rough weather or when the survivor is injured.

- Aid rescue hook
- For rough weather rescue
- Stainless steel hook with plastic handle
