

Our Business

IrvinGQ is a world-leading supplier of parachutes, aerial delivery systems and naval decoys to customers around the world. We create innovative products that our customers know they can rely on in highly challenging conditions where there are no second chances. Our systems must work right first time, every time. Do you want to be part of a collaborative and supportive team that helps customers achieve their goals through great engineering that stands out from the crowd?

We are currently recruiting for a **PDS Engineer** to join our Engineering team at Llangeinor, Bridgend, South Wales.

About the role:

The Post Design Services (PDS) engineer is a customer-facing role that ensures customers enjoy long term satisfaction with our products and services. You will work with customers to understand their evolving needs and will help to develop modifications and minor design alterations, requirements for modifications and improvements to products and services with product improvement.

Post design services is concerned with the redesign, redevelopment and engineering necessary for preserving an equipment's capabilities at the performance levels the customer expects and includes the work necessary to maintain the design and manufacturing data and reference equipment. Post design services may also be used for minor enhancements such as meeting new/safety legislation, reducing in-service support costs or addressing obsolescence.

Essential Skills and Qualifications

- 3 – 5+ years' experience in engineering design and manufacturing
- Analytical approach to problem solving combined with a drive to deliver products that are not "just like everybody else"
- Familiar with CAD tools
- Adaptable and biased to action, solution focused and knows how to get the best from the team.
- Able to remain objective, acting with integrity and honesty at all times
- Proactive customer-focussed attitude
- Engineering bachelor's degree or equivalent
- Able to hold a UK security clearance
- UK driving license

Advantageous skills and experience

- Experience in a regulated industry, such as defence, medical, automotive, etc
