

Our Business

IrvinGQ is a world-leading supplier of parachutes, aerial delivery systems and naval decoys to customers around the world. We create innovative products that our customers know they can rely on in highly challenging conditions where there are no second chances. Our systems must work right first time, every time. Do you want to be part of a collaborative and supportive team that helps customers achieve their goals through great engineering that stands out from the crowd?

We are currently recruiting for a **Project Engineer** to join our Engineering team at Llangeinor, Bridgend, South Wales.

About the role:

Project engineers own all the technical aspects of a project and are accountable for ensuring that the technical scope is delivered to time, cost and quality. You will define the overall technical programme and ensures that the technical team, from design through to manufacturing, comes together to deliver exciting products that delight customers.

Project engineers are involved in the delivery of projects that span from pure R&D through to through-life Post Design Services (PDS) customer support. A leader, bringing together a team to deliver high quality, mission critical capability when customers need it.

Essential Skills and Qualifications

- 3 – 5+ years' experience in engineering design and manufacturing
- An effective decision maker that exercises professional judgement and takes personal responsibility for the direction of projects and teams
- Analytical approach to problem solving combined with a drive to deliver products that are not "just like everybody else"
- Familiar with CAD tools
- Adaptable and biased to action, solution focused and knows how to get the best from the team.
- Able to remain objective, acting with integrity and honesty at all times
- Engineering bachelor's degree or equivalent
- Able to hold a UK security clearance
- UK driving license

Advantageous skills and experience

- Experience in a regulated industry, such as defence, medical, automotive, etc
- Experience of Autodesk Inventor
